You may make a comparison between the costs identified in this breakdown and the illustrative values provided in Section 7 of our Statement of Methodology and Charges for Connection. If, after making the comparison you are not satisfied with the accuracy of the Connection Charge, or feel we have not provided enough information to allow you to make an assessment, you may challenge it under the Quotation Accuracy Scheme (QAS). Further information detailing how you may enter into the QAS and a copy of Section 7 of our Statement is provided on our website:

**Electricity (Connection Charges) Regulations**

Where, in order to provide your connection we propose to utilise existing distribution system assets that were previously installed to provide a connection to another customer and that customer has paid us (either in part or in full) a Connection Charge for those assets, you may be required to make a payment towards them. Where said payment applies it will be identified in the break down given below.

**Reinstatement Costs**

Items above marked with an asterisk do not have a corresponding description in Section 7 of our Statement of Methodology and Charges for Connection therefore you will be unable to make a direct comparison. Where a marked item relates to reinstatement the costs will generally be higher than those identified in Section 7 because of the reinstatement type, typically cobbles, granite sets, flag stones, concrete, etc. For further information please contact the person identified on your Connection Offer.
