

## **Tender for PSDS Solar PV Extension DN583594**

### **Schedule 3 – Specification**

Installations are to use Tier-1 panels. Mounting system to be suggested by Tenderer to best suit each roof type. For each site, the Council wishes to be given a choice of inverter solution, with a Solar Edge option and a more basic cheaper option.

Tender evaluation award will be performed on the basic inverter option and the smaller of any array size option. Refer to the Price Schedule for more details. The Council is seeking Solar Edge inverter prices, and the larger-than-50-kW<sub>p</sub> prices, as options the Council may wish to take up later if possible.

The tender price should be total install costs, including scaffolding and any site welfare. It should also include a cost for conducting a structural survey.

Given the tight timescales of the work, tenderers should, for now, assume that the grid connection is sufficient to support any array the roof can accommodate.

Any awarded Contract will be subject to Dorset Councils Standard T&C's – refer to document (Dorset Council Standard Purchase Order Terms & Conditions.pdf)
