

Viewpoint

Ascent Homes use a system called Viewpoint for accessing drawings, information and specification. All subcontractors are expected to use this, in order to get the latest drawing revisions and updates.

If you are successful with the tender, an invitation will be sent to you from invitations@4projects.com, which you will have to accept.

This is how we issue our drawing for construction. A notification will be sent via email, but to view the drawings you must have accepted this invitation.

Upon winning the tender award, we will send you out a user guide, which will have further information on the system. We are also available to ask any questions or queries that you may have.

Please note, you must access ViewPoint to access the drawings, we will not be issuing drawings via email or mail, once the award is complete.
