

HSP

CLEANER / DEGREASER

Description

HSP Cleaner/Degreaser is an alkaline, non-flammable, virtually odour-free cleaning/degreasing solution.

Recommended Uses

Should be used to remove grease, oil, proteins dirt and many other surface contaminants. Can also be used as an additive for high-pressure (steam) cleaning.

Preparation

Scrape or sweep away dirt, oil, grease and other surface contaminants as much as possible.

Application

Shake well before use.

Apply with an artificial sponge, cloth or stiff nylon brush or broom.

Apply undiluted to heavily contaminated hard and glossy surfaces allowing several minutes before washing off with plenty of clean water. The use of a hard brush will improve cleaning. On emulsion paints and other matt surfaces use diluted with 5 parts water. Allow the surface to dry thoroughly before painting. Moisture left on the surface or entrapped into pores may cause premature failure of the coating system.

Coverage

6-8 m² per litre - varies according to porosity of surfaces and level of contamination.

Health & Safety

Avoid contact with eyes and skin. Wear suitable gloves and eye protection.

In case of contact with eyes rinse immediately with plenty of water and seek medical attention.

If swallowed drink plenty of water or milk and seek medical attention.
