Dynamic Purchasing System for Road Surface Treatments

DPS Ref: DN318931

Sub Specification for Joint Sealing

The Contractor shall provide a service under this Lot meeting the requirements of the following documents;

BBA HAPAS Guidelines document for the Assessment and Certification of Crack Sealing Systems for Highways – October 2010

The Highways Agency Design manual for Roads and Bridges, Volume 7 section 4 part 7, HD31/ 94 Maintenance of Bituminous Pavements.

Specification for Highway Works Volume 1 Series 700, Section 711 Overband and Inlaid Crack sealing systems.

In accordance with the RSTA/ ADEPT Code of Practice, works will cover;

- Overbanding as a repair or preventative treatment for narrow cracks and joints in asphalt and concrete
- Fill and overband systems for the infill, repair and sealing of open or fretted joints and wide cracks in asphalt and concrete
- Inlaid crack repair systems for the repair of single or multiple cracks in asphalt and concrete over any width

The Contractor will use a HAPAS approved product working to National Highway Sector Scheme 13 for Quality Management in Highway Works and have secured or be working towards an accredited ISO 9001 Quality Management System.

The Contractor shall ideally be a member of or be approved by the RSTA.
