Introduction

BSI PAS 91 is a publicly available specification (PAS) that sets out the content, format and use of questions that are widely applicable to prequalification for construction tendering. The PAS sets out, not only the questions that are to be asked in a prequalification system claimed to be compliant with PAS 91, but also establishes rules for their application.

To assist procurement organizations, buyers and assessment providers in their use of PAS 91, this document provides the PAS 91 prequalification questions in their entirety, in a form that can be used to create PAS 91 compliant questionnaires that suppliers will be able to use to submit their responses to the questions asked. This document should therefore be considered as supplementary to PAS 91: 2013+A1: 2017.

Users of this document are reminded that PAS 91 requires that questions be included in prequalification processes without modification (see PAS 91: 2013+A1; 2017, clause 3). In providing this document, every effort has been made to ensure the accurate reproduction of the PAS 91 questions but those using it to prepare their own questionnaires are responsible for ensuring that when incorporated in those questionnaires, the content of each question remains exactly as the equivalent question in the published PAS.

Any dispute as to the validity of a question presented in a prequalification questionnaire is to be resolved by reference to the relevant question in the published version of PAS 91:2013 and not to any copy of this supplementary document.

PLEASE NOTE:

To facilitate cross referencing between this supplementary document and the original PAS, the clauses in this document retain the numbers from the published version of PAS 91: 2013+ A1: 2017.

4. Core and optional questions

4.1 Application of core question modules

The questions provided in tables 1 to 4 are core questions and shall be included as specified in Clause 3, in every prequalification questionnaire for which compliance with this PAS is claimed, other than in the circumstances provided for in the respective tables.

It is acknowledged that the nature and extent of the accounts provided will be commensurate with the business requirements and legal obligations of the supplier.

Table 3 – Core Question Module C3: Business and professional standing

For all procurement situations other than that for the public sector, including defence and security, procurement buyers shall require that suppliers in their responses to the questions in module C3, make known all pertinent information in respect of business related, criminal or civil court judgements against them and identify any ongoing or pending cases.

For public sector procurement the process for obtaining this information is prescribed in the Public Contract Regulations 2015 (PCR 2015), and Clause 4.3 of this PAS provides alternative questions aligned to the requirements of the PCR 2015, including those for the ESPD. Alternatively, suppliers who have already completed an ESPD template can submit that completed ESPD in lieu of Table 3. For procurement in the scope of the Defence and Security Public Contract Regulations 2011, Clause 4.4 of this PAS provides the necessary alternative questions (see also **Annex B**).

NOTES TO TABLE 4

NOTE 1 Assessors should not request unnecessary paperwork and may not necessarily require evidence of all the examples in column 3 of Table 4. Suppliers (including contractors, consultants and others) should only be required to produce enough evidence to show that they meet the relevant criteria, taking account of the nature of activities/projects likely to be involved, and the hazards and risks. This requires assessors to make a judgement as to whether the evidence provided meets the standard to be achieved. If that judgement is reasonable, and clearly based on the evidence requested, assessors cannot be criticised if the supplier they appoint subsequently proves not to have the necessary capability (essential knowledge, skills and experience) when carrying out the activity.

NOTE 2 For suppliers that will be CDM duty holders - The core questions in Table 4 align with legal requirements on the relevant duty holder under the Construction (Design and Management) Regulations (CDM 2015).

NOTE 3 For suppliers that will be CDM duty holders - Asking the questions in Table 4 does not remove the buyer's requirement to make further enquiries about the supplier's H&S capability, as required for specific projects, services or other activities.

Stage 1: An assessment of the supplier's organization and arrangements for H&S, to determine whether these are sufficient to enable the supplier to carry out the activity safely and without risk to health. Stage 1 assessments assess the general (basic) capability of the supplier and are within the scope of PAS 91.

Stage 2: Stage 2 assessments are outside the scope of PAS 91*. They involve an additional assessment of the supplier's experience, technical capability and track record, to establish that: it is capable of carrying out the actual construction activity/project required (i.e. project, activity or service-specific enquiries), and notably in relation to higher hazard activity; that the supplier recognizes any limitations and how these should be overcome; and appreciates the hazards associated with the activity and how the risk should be effectively controlled.

*Stage 2 assessments follow Stage 1 enquiries and they should not therefore be asked in relation to PAS 91 (although in the public sector only, stage 2 questions relating to previous experience will be asked in the prequalification questionnaire - if required by law).

NOTE 4 If a supplier has fewer than five employees it is not legally required to write down its general policy, organization or arrangements. However, it does need to be able to show that its arrangements are adequate in relation to the type of activity likely to be undertaken.

NOTE 5 Relevant and proportionate CPPs are required for 'construction work' covered by CDM 2015. CPPs need only be proportionate to the nature of the activity likely to be undertaken.

NOTE 6 RIDDOR: The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013.

4.3 Application of C3 (business and professional standing) in Public Sector procurement

The questions provided in Tables 9 and 10 shall be used in place of those in Table 3 for public sector procurement in the scope of the Public Contracts Regulations 2015.

Suppliers who have an already completed a European Single Procurement Document (ESPD) template can submit that completed ESPD in lieu of Tables 9 and 10. Alternatively Contracting Authorities can request that suppliers complete the EU electronic version of the ESPD, through the Commission's E-ESPD service or the self-declaration module of the Contracting Authorities e-procurement platform.

Tables 9 and 10 need to be completed by each organization being relied on to meet the selection criteria. A completed Table 1 and self-declaration is also required from each organization.

Procurements in scope of the Defence and Security Public Contract Regulations 2011 shall substitute Tables 11 and 12 for Table 3. Clause 4.4 of this PAS provides the necessary alternative questions.

4.5 Supplementary or additional questions

Introduction: Table 13 provides a format for asking supplementary or additional questions which, if necessary can be interpolated into the core and optional question modules presented in Tables 1 to 8. In recognizing that supplementary or additional questions may need to be asked and providing for their inclusion in existing question modules, **Clause 3.2** specifically requires that any supplementary or additional questions be referenced in a manner that clearly identifies the fact that they are supplementary or additional questions and numbered in a manner that does not change the number sequence of the original PAS 91 questions, in the module in which they are inserted.

This format and the example questions used for its demonstration in Table 13, may be used in prequalification processes that relate to specific projects or frameworks, where applicants are required to meet minimum standards of technical and/or professional ability. Before choosing to use these example questions however, buyers and assessment providers should have particular regard to reducing unnecessary documentation requirements for businesses and in any event only request information that is related and proportionate to the subject matter of the contracts likely to be awarded (see Note to this Clause).

Whilst the use of this particular format and numbering system are not requirements of this PAS and users may adopt whatever method of presentation is best suited to the nature of the question(s) to be asked, the requirements of **Clause 3.2** in respect of relevance and proportionality, additionality and numbering, shall still be met for any supplementary or additional questions that may be asked.

NOTE Where prequalification processes are required to be OJEU compliant, the allowable means of evaluating compliance with minimum standards of technical and professional ability are described in Public Contracts Regulations 2015 Regulations 58(15) - 58(18) and Regulation 60(9), and questions should be formulated to address such evaluation. They should also be related and proportionate to the subject matter of the contracts likely to be awarded.
