The Kent and Medway Sustainability and Transformation Partnership (STP) is supporting NHS and social care organisations to change and improve the services we provide to people across the county.

We are holding a conference for front-line NHS, care and volunteer colleagues, who are key to making this positive change happen, to learn and share best practice of how integrated care is working across Kent and Medway.

We will also update you on the development of primary care networks and how we are responding to the NHS Long Term Plan.
