SCHEDULE 1: GREENHOUSE GAS REPORTING

1. This Schedule shall be completed on each anniversary of the Works commencement date as specified in the Contract Particulars of this Contract by the Contractor and the completed schedule shall be referred to as the “Sustainability Report”. The CO₂ equivalent emissions associated with fossil fuels will be calculated, and the water usage, recycling rates and waste produced will be reported.
2. The Sustainability Report will demonstrate, measure and report on the carbon emissions (CO₂ equivalent) associated with the delivery of the Works under this Contract.
3. The Sustainability Report will set out the Overall Sustainability Impact of the Works, including improvements identified by the Contractor, new policies or targets adopted to reduce the environmental impact of the Contractor’s operations and contributions towards any Employer environmental policies or targets.
4. The calculation methodology for the Sustainability Report will follow the latest guidance from DEFRA³ and include:

Step 1.

Measure the greenhouse gas emissions for the Contractor’s business,

- taking into account the parts of the Contractor’s business which the Contractor either owns or has control over. This means that the Contractor is only measuring emissions which relate to the Contractor’s business operations. To do this, the Contractor needs to set a boundary which will ring fence the Contractor’s business operations and will help identify which greenhouse gases the Contractor needs to measure; and
- apportion the emissions relating to this Contract, noting the assumptions that the Contractor has made.

Step 2.

Identify the main activities relating to this Contract, that release greenhouse gases in the Tables 1 (Fossil Fuel Use) and Table 2 Water & Waste) below.

³ Latest guidance follows the DEFRA approach and can be found at: https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/69494/pb13310-ghg-small-business-guide.pdf

Step 3.

The assumptions made in the calculation of the emissions associated with this Contract are to be expressly stated in Tables 1 (Fossil Fuel Use) and Table 2 (Water & Waste) below.

Step 4.

Provide information on the Overall Sustainability Impact of the Works and return the completed Sustainability Report and Tables 1 (Fossil Fuel Use) and Table 2 (Water & Waste) to the Employer.

3.5.5 Electrical safety

In addition to the advice given in the HSE Best Practice Guide “Guidance on Safe Isolation Procedures for Low Voltage Installations”, the Contractor shall take account of the following requirements:

During the period of the electrical testing, the Contractor shall ensure the safety of the electrical installation and that control of the electrical danger within the area of the contract is the responsibility of a Competent Person in his employ

The electrical installations will be formally delegated to the Competent Person identified by the Contractor at the start of the contract and upon completion will be “handed back”, with the transfer of responsibility being recorded on a standard form to be agreed under the contract

The Contractor shall not work on any electrical circuit in which all phase (live and neutral) conductors have not been isolated, except where this is necessary to carry out a particular test or procedure (for example: polarity, earth fault loop impedance and the functional testing of RCDs, RCBOs, switchgear and control gear)

Before commencing work, isolation shall have been carried out by either physically removing the links or fuses and by a locking device securing the isolation in an “off” position

Substantial warning notices shall be securely fixed to the control device clearly labelled “PLEASE DO NOT SWITCH ON - OPERATIVE WORKING”. These notices are to include the Contractor’s trading title together with the name of the Responsible Person who is responsible for the electrical safety within the area, and throughout the duration of the contract a 24-hour contact telephone number.

3.5.6 Dangerous Conditions (C1 – danger present)

C1 (Danger present) reporting classification code should be used to indicate that danger exists, requiring immediate remedial action.

The Contractor shall assume responsibility on behalf of the client to reduce the risk of a C1 discovery.

The Responsible Person ordering the report should be advised to take action without delay to remedy the observed deficiency of the installation. If applicable the Contractor, upon receipt of the responsible person's direction shall take immediate remedial action and upon completion shall issue an authorisation for rectification.

If this cannot be achieved, then the inspector is to take appropriate action (such as switching off and isolating the affected parts of the installation) to remove the danger.

The inspector should not wait for the full report to be issued before giving this advice.

If the Responsible Person is unable to approve rectifications to resolve the issues, a 'Dangerous Condition Notification' form with photographs will be issued by the inspector to record and communicate the dangerous condition discovered. The circuit shall be isolated not to allow accidental/unauthorised switch on.

3.5.7 Certificates and reports

Following the periodic inspection and testing of an existing installation, an Electrical Installation Condition Report or Electrical Installation Certificate together with one or more schedules of inspection and one or more schedules of test results are to be submitted to the Employer ordering the inspection. These certificates must be electronically recorded and issued to the Employer electronically. Please note: Hand written reports will not be accepted.

All fields of the documentation must be completed appropriately. External Earth Loop Impedance and Perspective Fault Current must be detailed by enquiry with the Distribution Network Operator or Electrical Supplier where test results cannot be obtained by measurement.

Observations must describe the danger in simple terms and observation code classifications are to be readily backed by regulations and cross referenced in the inspection schedule.

Where, during the course of inspection or testing, an immediate danger is found to be present in an installation, immediate action will be necessary to make it safe before continuing. The employer is to be notified immediately in conversation and in writing, detailing the observation to include photographic evidence and details of repairs required for authorisation. At no point should an immediate danger to be left energised.

3.6 Categorisation of defects

For the avoidance of doubt the following categorisation shall be used:

C1: Immediate Danger – e.g. Exposed live parts, Open gap in the consumer unit, badly damaged accessory, Incorrect Polarity, Conductive parts are live due to fault

C2: Potentially Dangerous – e.g. Poor Earthing, Absence of RCD for portable equipment used outside or where is located in a bath or shower room, Absence of earthing at a socket.

C3: Non-Compliance – Improvement recommended – e.g. Absence of an RCD, undersized bonding conductor, general standards and regulations not met.

FI : Where there is a fault or unknown circuit that may require further investigation.

3.7 Actions to be taken

C1 Faults – Where the cost of a repair will exceed a gross invoice value of £200.00 notify Employer who will direct the action to be taken to ensure faults are rectified on the day of inspection.

C2 Faults - Where the cost of a repair will exceed a gross invoice value of £50.00 notify Employer who will direct the action to be taken to ensure faults are rectified on the day of inspection.

The cost for the repairs of the C1 & C2 can be aggregated to the total cost of £250.00, as required, but should not exceed this total without confirmation from the Employer.

C3 Faults – Notify Employer within usual reporting to enable a programme of works to be prepared for execution under a separate contract.

FI - notify Employer on the day of inspection.

Matter related to reg. 553.1.7 BS7671:2015, where a property has a number of extension leads due to lack of sockets include within report and advise Employer within the usual meeting and reporting procedure

Unauthorised alterations - where a property has unauthorised alterations include within report and advise Employer within the usual meeting and reporting procedure. Enquire of tenant whether a “Part P” certificate was requested or obtained.

Absence of smoke detectors - include within report and advise Employer within the usual meeting and reporting procedure.

Where there is no smoke detector present, the Contractor will supply and install a new Smoke Detector D1-LD3 wireless.

Disconnected mains smoke detectors where the detector head is on site – reinstate detector head.

Where the smoke detectors are disconnected, they should be reinstated and interlinked to the existing smoke system.

Smoke detector heads assessed as being older than 10 years - include within report and advise Employer within the usual meeting and reporting procedure.

Where the smoke detectors require replacement, the Contractor shall carry out this requirement whilst in attendance at the property.

3.8 Electrical Priority Rewires

Where findings are conclusive and the Employer approves the requirement, these works shall be commenced within 7 days of receipt of instruction from the Employer.

Key Performance Indicators

For

Electrical Inspection Condition Reports and Remedial Works to residential properties

KPI 1: Properties contacted for access

| | |
|-------------|--|
| Purpose: | To determine the required number of appointments successfully arranged with residents to secure access. |
| Definition: | The proportion of appointments made against the plan for the month. |
| Method: | <p>With reference to the forward plan (as provided by the Contractor) to be contacted for arrangements to be made to attend and carry out EICR test.</p> <p>Performance Data:</p> $\frac{\text{Total Number of Appointments Made}}{\text{Number of Planned Properties}} \times 100$ |
| Example: | <p>During a month, using the forward plan of the following month's properties to be tested (i.e. 60), 54 residents were contacted to arrange access.</p> <p>Performance Data:</p> $\frac{54 \text{ Contacted}}{60 \text{ Planned}} \times 100 = \mathbf{90\%}$ |
| Target: | 90% |

KPI 2: Properties attended in the period

| | |
|-------------|--|
| Purpose: | To determine the number of properties attended during one month |
| Definition: | The proportion of properties attended against the plan for the month. |
| Method: | <p>With reference to the forward plan of how many properties are to be attended to carry out EICR test.</p> <p>Performance Data:</p> $\frac{\text{Total Number of Properties Attended}}{\text{Planned properties}} \times 100$ |
| Example: | <p>During a month, using the forward plan of the following month's properties to be tested (i.e. 60), 54 residents were contacted to arrange access.</p> <p>Performance Data:</p> $\frac{54 \text{ Attended}}{60 \text{ Planned}} \times 100 = \mathbf{90\%}$ |
| Target: | 95% |

KPI 3: EICR Certificates completed

| | |
|-------------|--|
| Purpose: | To measure whether the planned number of Certificates has been completed on time. |
| Definition: | The difference between the planned number of certificates completed as per the contractor's programme and the actual number completed. |
| Method: | <p>On a property by property basis the contractor to record the actual number of Certificates completed against the planned number to be completed within the month. Variances to be calculated by the contractor.</p> <p>Using the number of certificates actually completed within the month to calculate the variance.</p> <p>Performance Data:</p> $\frac{\text{Number of certificates completed}}{\text{Number of certificates planned}} \times 100$ |
| Example: | <p>The number of certificates actually completed was 40</p> <p>Performance data:</p> $\frac{40 \text{ certificates completed}}{45 \text{ Number of properties started}} \times 100 = \mathbf{89\%}$ |
| Target: | 90% |

KPI 4: EICR Certificates provided

| | |
|-------------|---|
| Purpose: | To measure the number of Certificates provided to F&HDC against the number of certificates reported by the Contractor as completed |
| Definition: | The difference between the number of certificates completed as per the Contractor's report and the actual number provided to F&HDC. |
| Method: | Performance Data: $\frac{\text{Number of Certificates provided}}{\text{Number of Certificates reported completed}} \times 100$ |
| Example: | The number of certificates actually provided this month was 47 and the number of certificates completed is declared as 50 Performance data: $\frac{47 \text{ Number of certificates provided}}{50 \text{ Number of certificates reported completed}} \times 100 = \mathbf{94\%}$ |
| Target: | 95% |

KPI 5: Proportion of Contract Complete

| | |
|-------------|--|
| Purpose: | To determine the proportion of the Contract Complete |
| Definition: | The difference between the plan of works to be completed under the contract as per the contractor's programme and the actual works completed. |
| Method: | <p>Performance Data:</p> $\frac{\text{Actual Number of Tests completed cumulatively for the year}}{\text{Planned Number of Tests cumulatively for the year}} \times 100$ |
| Example: | <p>Each month's completed tests added to the previous to produce a cumulative effect.</p> <p>Performance Data:</p> $\frac{600}{5298 \text{ Tests required}} \times 100 = 11.32\% \text{ completed}$ <p>Performance Score:</p> <p>% planned per month</p> |
| Target: | 95% to plan – appreciating there may be issues with access |

KPI 6: Customer Satisfaction

| | |
|-------------|--|
| Purpose: | Percentage of Customers Satisfied by the Contractor before and during the EICR visit. |
| Definition: | The before is the appointment process – communications. The during is how the engineers engaged with the residents and dealt with any issues on site. |
| Method: | |
| Example: | |
| Target: | 98% to plan |

ELECTRICAL CONTROLLED ACCESS PROCEDURE FOR NON-COMPLIANT PROPERTIES

| | |
|------------------|--|
| Related policy | Compliance (Safety) Policy 2021 |
| Date for review | Nov 2023 |
| Procedure author | ██████████, Assets and Development Lead Specialist; ██████████, Performance Specialist |
| Procedure owner | ██████████, Compliance Senior Specialist |
| Approved by | ██████████, Director of Housing and Operations; ██████████ portfolio holder for Housing and Special Projects |

1. Purpose of the Procedure

- 1.1 The Folkestone and Hythe District Council (FHDC) Policy states that we will use the legal remedies available within the terms of the tenancy agreement, lease or license should any tenant refuse access to carry out essential safety checks, maintenance and safety related repair works. This will be following a 'controlled access' procedure.
- 1.2 The purpose of this procedure is to set out the process FHDC officers will follow, in relation to electrical safety. In addition, it explains the steps we will follow to gain access to a property in an emergency and when we may need to complete other safety checks, such as for fire, water, electricity and asbestos.

2. Legal / Regulatory Framework

- 2.1 **Landlord and Tenant Act 1985.** This includes a statutory responsibility for repairs to be carried out on gas installations in rented properties. Section 11b: "To keep in repair and proper working order the installations in the dwellinghouse for the supply of water, gas and electricity and for sanitation (including basins, sinks, baths and sanitary conveniences, but not other fixtures, fittings and appliances for making use of the supply of water, gas or electricity)".
- 2.2 **Housing Act 2004.** Section 240 provides a mechanism for [housing providers] to obtain a court warrant to enter premises (by force if necessary), where access has not been forthcoming to carry out a gas safety inspection.
- 2.3 **Housing Act 1988.** Section 16 of the Housing Act 1988 states the tenant shall afford to the landlord access to the premises for executing any repairs which the landlord is entitled to execute.

3. Tenancy Agreement

- 3.1 The FHDC Tenancy Agreement (section 8.6) states that: "By law all homes must have an electrical safety check every five years. We will try to arrange for a safety inspection at a time that suits you. If we cannot carry out the inspection because you do not respond to our request to let us into your home, we will serve a seven-day notice telling you when we will call again. If you do not let us in, we will force entry to carry out the safety check." And:
- 3.2 "We will take reasonable care in forcing entry and we will secure your home as we leave. When the Council needs to carry out the safety check or in an emergency, when either the property or the person's safety is at risk, we may require immediate access to the property. If the property is unoccupied the Council may force entry into the property to deal with the emergency. The

property will be properly secured and repaired as necessary (unless entry was necessary as a result of your carelessness or neglect).”

4. **Non-access/forced entry**

- 4.1 The Council will make every effort to obtain access within the normal period. However, if access has still not been granted, we will take enforcement action to gain entry to the property if necessary. This may mean undertaking a ‘forced entry’ as indicated in the Tenancy Agreement (see 3.1 above). In all cases where we have not been granted access to the property, the following procedure will be applied:

5. **The Procedure**

Access for Electrical Safety Checks (See also flow chart below)

- 5.1 The Service Provider will provide flexible appointment times to tenants to carry out a Electrical Safety Check including evening and Saturday appointments. The following timescales are ideal and given as a guide.
- 5.2 At least 7 days prior to the appointment by the electrical service provider, an initial letter will be sent to the tenant(s) they will provide them with a free phone contact number to rearrange the appointment if not convenient.
- 5.3 If access cannot be obtained at the time of the first appointment, the engineer will leave a call card advising the tenant of a second appointment for the EICR allowing 7 days’ notice. The call card will also advise the tenant to contact the electrical service provider within 7 days to rearrange the appointment if the time is inconvenient. The electrical service provider will supply photographic evidence of the call card at the property address, clearly showing the entrance door and call card before being posted through the letterbox.
- 5.4 If access cannot be obtained on the second appointment, the engineer will leave a second call card advising the tenant to contact the electrical service provider within 7 days to arrange a new appointment. The engineer will provide photographic evidence of the call card at the property address clearly showing the entrance door and ‘out-card’ before being posted through the letterbox.
- 5.5 If access cannot be obtained on the third appointment, a final letter will be left giving the tenant 7 days to contact the electrical service provider.
- 5.6 If no contact has been received from the tenant within 7 days, the electrical service provider will refer the case to the Council’s Compliance Specialist for

electrical safety. The Compliance Specialist will send a 'Pre-Authorised Access' letter, giving the tenant 7 days' notice of pending action.

- 5.7 If no contact has been made by the tenant or access to the property granted, the Compliance Specialist will seek authorisation from the Assets and Development Lead Specialist to authorise a forced entry to the property. (See section 6 below). At this point, a member of the Council's housing team will attempt to contact the tenant by telephone, email, social media, or by visiting the property within the next 7 days to arrange access.
- 5.8 If access has not been granted by the tenant an appointment will be made for the electrical safety check and a letter sent confirming the intention to gain access to the property.
- 5.9 Authorised Access appointment arranged with electrical service provider. If access is not granted by the tenant, the Council and electrical service provider will proceed with a 'forced entry' to the property to ensure the EICR is completed. (See below).

6. Forced entry

- 6.1 If access has still not been granted by the tenant after all previous steps have been followed (5.1 to 5.9 above,) or in the case of an emergency, the Council will carry out a forced entry. Locks will be changed, and new keys passed to the Housing Officer. Notification will be left at the address advising the tenant the nature and the reasons for the forced entry and where to collect the keys.
- 6.2 The forced entry will require the presence of a locksmith, in addition to two housing officers or maintenance surveyors to:
 - a) take photographic evidence of the doors and locks (before and after drilling, and then after the new lock is fitted and premises re-secured) and remain at the front door whilst the gas installations are being checked, to ensure no one else enters; and
 - b) accompany the electrical servicing engineer whilst they inspect to ensure no possessions are touched or altered.

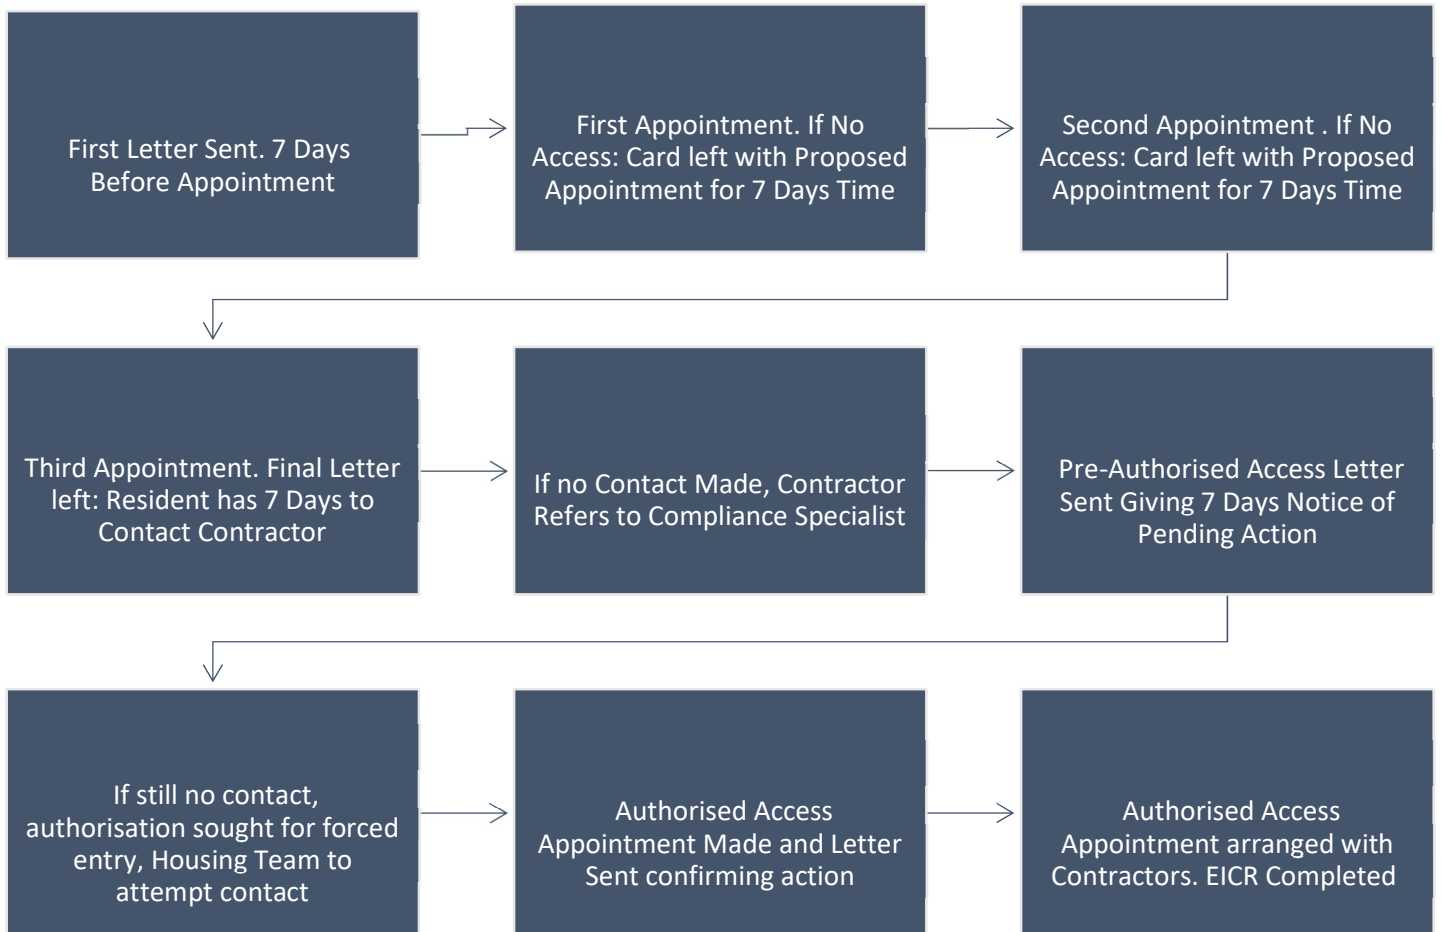

8. Vulnerable tenants

- 8.1 Where a tenant has or may have a protected characteristic under the Equality Act 2010, in particular, where the tenant may be disabled, have mental health issues, language or learning difficulties, the Council will make reasonable adjustments to its controlled access procedure. These adjustments may include (but are not limited to):

- 8.1 a) Making additional enquiries, involving third parties or agencies, translation services, or conducting further visits
- 8.1 b) Ensuring the tenant fully understands the process and the reasons why the electrical safety check and/or the forced entry is necessary, particularly with tenants who suffer from mental health disabilities or other vulnerabilities
- 8.2 Where there are particular concerns around a tenant's vulnerability, the Council may decide that it is inappropriate to use the forced entry procedure, and that injunctions will be sought instead.
- 8.3 In all cases, vulnerable tenants will be dealt with compassionately, with every avenue explored to gain access with the tenant's consent, before any action to force entry is considered, and that this as a last resort. To ensure due process is followed a record of all communication will be kept, to evidence compliance with this policy and procedure.

Open Procedure

Potential Supplier Information and Exclusion Grounds: Part 1 and Part 2.

The SQ template includes a self-declaration, made by you (the potential supplier), that none of the grounds for exclusion apply¹. If any of the grounds for exclusion do apply, there is an opportunity to explain any measures you have taken to demonstrate your reliability notwithstanding the existence of a ground for exclusion (we call this self-cleaning).

We require all the organisations that form part of your bidding group/consortium and each subcontractor that you are relying on to meet the selection criteria to provide a completed part 1 and part 2. This means that where you are joining a group of organisations, including joint ventures and partnerships, each organisation in that group must complete one of these self-declarations. Subcontractors that you rely on to meet the selection criteria, must also complete a self-declaration (although subcontractors that are not relied upon do not need to complete the self-declaration).

When completed, this form is to be sent back to the contact point given in the procurement documents along with the selection information requested in the procurement documentation.

Supplier Selection Questions: Part 3

The procurement documents will provide instructions on the selection questions you need to respond to and how to submit those responses. If you are bidding on behalf of a group/consortium or you intend to use subcontractors, you should complete all of the selection questions on behalf of the group/consortium and/or any subcontractors.

If the relevant documentary evidence referred to in the Selection Questionnaire is not provided upon request and without delay we reserve the right to exclude you from the procurement process, including where an award decision has already been notified, and award to another supplier.

¹ See Annex A for full list of exclusions

Consequences of misrepresentation

If you seriously misrepresent any factual information in filling in the Selection Questionnaire, and so induce an authority to enter into a contract, there may be significant consequences. You may be excluded from the procurement procedure, and from bidding for other contracts for three years. If a contract has been entered into you may be sued for damages and the contract may be rescinded. If fraud, or fraudulent intent, can be proved, you or your responsible officers may be prosecuted and convicted of the offence of fraud by false representation, and you must be excluded from further procurements for five years.

Notes for completion

1. The “authority” means the contracting authority, or anyone acting on behalf of the contracting authority, that is seeking to invite suitable candidates to participate in this procurement process.
2. “You” / “Your” refers to the potential supplier completing this standard Selection Questionnaire i.e. the legal entity responsible for the information provided. The term “potential supplier” is intended to cover any economic operator as defined by the Public Contracts Regulations 2015 (referred to as the “regulations”) and could be a registered company; the lead contact for a group of economic operators; charitable organisation; Voluntary Community and Social Enterprise (VCSE); Special Purpose Vehicle; or other form of entity.
3. Please ensure that all questions are completed in full, and in the format requested. If the question does not apply to you, please state ‘N/A’. Should you need to provide additional information in response to the questions, please submit a clearly identified annex.
4. 4. The authority recognises that arrangements set out in section 1.2 of the standard Selection Questionnaire, in relation to a group of economic operators (for example, a consortium) and/or use of subcontractors, may be subject to change and will, therefore, not be finalised until a later date. The lead contact should notify the authority immediately of any change in the proposed arrangements and ensure a completed part 1 and part 2 is submitted for any new organisation relied on to meet the selection criteria. The authority will make a revised assessment of the submission based on the updated information.
5. For Part 1 and Part 2 every organisation that is being relied on to meet the selection must complete and submit the self-declaration.
6. For the mandatory exclusion grounds only (Q2.1(a)), you must complete the declaration for all relevant persons and entities. There are two categories of persons and entities:
 - members of your administrative, management or supervisory board; secondly, entities and persons who have powers of representation, decision or control. You must decide, depending on the nature and structure of the entity or person who is bidding, which entities and persons this applies to in your particular circumstances. Clearly, members of your administrative, management or supervisory board should be easily identifiable and will cover company directors (or equivalent for other types of corporate entities) and members of an executive board.
 - the second category of those with powers of representation, decision or control, is likely to be more complicated. As an illustration, entities or persons with 25% or more shareholding (or equivalent for other types of corporate entities) are likely to have powers or representation, decision or control, although those with a lower shareholding may still have the relevant powers depending on their particular rights. Similarly, your ultimate parent

company (or equivalent for other types of corporate entities) is likely to have powers of representation, decision or control. Depending on your particular structure, intermediate parent companies who do not have a direct shareholding, directors or members of an executive board of your immediate parent company (for example in the case of an SPV set up specifically to bid for a particular contract), and holders of mortgages or liens may be covered. It isn't necessary to identify which entities and persons you think are covered but you must be satisfied that your declaration is made in respect of all of those that are covered.

7. Not used.
8. For answers to Part 3 - If you are bidding on behalf of a group, for example, a consortium, or you intend to use sub-contractors, you should complete all of the questions on behalf of the consortium and/ or any sub-contractors, providing one composite response and declaration.

The authority confirms that it will keep confidential and will not disclose to any third parties any information obtained from a named customer contact, other than to the Cabinet Office and/or contracting authorities defined by the regulations, or pursuant to an order of the court or demand made by any competent authority or body where the authority is under a legal or regulatory obligation to make such a disclosure.

9. The Public Procurement Review Service allows government suppliers and potential government suppliers to raise concerns anonymously about unfair public sector procurement practice. The government can then investigate and resolve these concerns for contracting authorities as listed in [Schedule 1](#) of the Public Contracts Regulations 2015. To use the Public Procurement Review Service, [read the terms](#) and email publicprocurementreview@cabinetoffice.gov.uk or phone 0345 010 3503.

Part 1: Your information and the bidding model

You must answer all questions in parts 1 and 2, and you must answer all questions in part 3 as well.

Bidders must ensure that every organisation on which they will rely to meet the selection criteria completes and submits their own answers and declaration for part 1 and 2.

| Training | | |

They also complete UKATA-approved Cat B Non-Licensed Asbestos Drilling and Removal training. The content of our mandatory iHASCO training on Data Protection, Safeguarding, Customer Service and Equality & Diversity reflects that of our annually reviewed policies and each of our team completes Dementia Friends training. Details of all learning undertaken by our team including dates for refresher training and expiry dates as applicable are captured and monitored by our SHEQ Advisor on a Training Matrix.</p> | | |
| Apprenticeships | | |
| <p>We have worked with JTL Training since 2002 to provide young people and those seeking a career in the electrical industry with 4-year Electrical Apprenticeships. Each of our current team of 14 JIB-registered Apprentices is working towards achieving NVQ 2357 Level 3 - Electrical Installation. We always include Apprentices in our resourcing structures for individual contracts. Supervision and guidance are provided to Apprentices by a named NRT electrician and / or Electrical Supervisor, and each of our Apprentices completes our iHASCO Health and Safety training programme and policy-</p> | | |

related iHASCO training. We always offer our Apprentices full-time employment as an electrician with NRT upon achievement of their qualifications and fund C&G 2391 courses within 12 months of their qualification. Demonstrating the value of our Advanced Apprenticeships, one of our Apprentices tells us that, "During my Apprenticeship, I have had the opportunity to carry out a wide range of work, from domestic installations to large commercial projects. This has allowed me to complete my college exams and portfolio with relative ease [and] given me a broad knowledge that will help me in my future career. The electricians I have worked with have been both supportive and knowledgeable."

Continuing Professional Development

Our established approach to **Continuing Professional Development** includes the provision of promotions within our workforce in recognition of our team's skills, which enhance their skill sets and contribute to the achievement of their career ambitions. In the last year, we have promoted five NRT electricians to Electrical Supervisor roles, with SSSTS and An Introduction to Management courses funded by NRT.

Further to our Apprentices completing their Advanced Apprenticeships, achieving NVQ 2357 Level 3 - Electrical Installation and accepting our offer of full-time employment as an Electrician with NRT, we **provide funding for C&G 2391 courses** which enable them to be fully qualified to undertake EICRs.

We **fund additional training** to enable our team to achieve specific qualifications. Our Accounts Supervisor Victoria Goodridge joined NRT in June 2013 after achieving A Levels in Mathematics, Photography and Business Studies at Sixth Form College. Since doing so, we have provided her with funding to achieve AAT Level 4 over a three-year period. We are currently funding an ACCA qualification for Victoria which will result in her becoming a qualified Chartered Accountant. In addition, we have funded a management training course for Adam Smith who is now one of our Directors, resulting in the achievement of ILM Level 5 Management. We are currently funding an ILM Level 4 course which is being undertaken by Craig Barham, our Contracts Manager – Electrical.

Sub-contractors

Our **established approach to selecting sub-contractors** is based on the principles of our Procurement policy, which we review annually. To ensure that our sub-contractors meet our expectations as well as those of our buyers, we select contractors based on a written criteria of quality standards, requesting evidence for consideration as part of our selection process. This evidence includes details of the contractor's commitment to the development of workforce skills through the provision of a mandatory programme of ongoing learning and development and CPD including details of training records, as well as evidence of a commitment to offering Apprenticeship opportunities.
