

Good news, your development is eligible for a free full fibre network

18/05/2021

Site reference: **BB/C/00L New Office Space Market Place Castle Quay Shopping Centre Banbury OX16 5UN**

Dear **Emily Ambler**,

Thanks for choosing to register your development with Openreach. Your site has access to the latest full fibre infrastructure technology, enabling ultrafast speeds for your new business tenants, completely free of charge to you.

This email contains everything you need to explore the benefits of a full fibre connection and progress your application.

Full fibre benefits

A full fibre connection provides essential benefits for developers and businesses. Businesses are more connected than ever, with connectivity in the workplace enabling cloud computing, remote working and networked offices. These services need a modern, future-proof network with a choice of internet service providers.

Cloud storage and VoIP telephone services are increasingly taking over from on-site backups and landlines for businesses. Poor connectivity or broadband downtime can cause major issues with these services, so the reliability offered by full fibre networks is more important than ever for your business premises.

Openreach full fibre provides your commercial developments with a modern platform for businesses to enable the connectivity they need, using the provider of their choice through our unrivalled open-access network.

You can view more about the benefits of full fibre broadband by clicking on the images below to view our commercial development brochure.

Next steps

To continue your site registration please complete the signature page of the agreement attached on this email. Take some time to double check the details provided as we'll use these to contact you throughout the application and build process.

Once you've filled in all the yellow fields, email it back to nsrecep@openreach.co.uk and we'll progress your application. You can also contact us on this email if you need to amend any of the details on the application.

Make sure to email the completed agreement as soon as you can, as this allows us to move onto the next phase of the process as quickly as possible.

Other infrastructure options

A full fibre network is the recommended choice for all new commercial developments in the UK. Here at Openreach we're working hard to ensure this choice is as affordable as possible for every developer, adding value for you and future-proofing the property for business tenants.

Although full fibre is now our default infrastructure choice and is being offered to you free of charge, copper or partial fibre connections are still available for new commercial sites at a cost to you.

To discuss other infrastructure options please email nsrecep@openreach.co.uk and one of our team will be in touch.

Thanks,

The Openreach New Sites team
